### Perceived likelihood

of being able to live in current home for remainder of life4:

**54%** very likely

21% somewhat likely

9% not too likely 10% not likely at all

### Should you stay or should you go?

### Stay?

This may involve adapting and improving accessibility in the home to tailor it to specific requirements.

Some cost effective modifications that can create independence for your loved one and increase safety in your home are<sup>5</sup>:

Straight stair lift \$3,000-\$5,000

Curved stair lift \$10,000-\$25,000

Porch lift \$5,000-\$10,000

Interior vertical lift \$10,000-\$25,000 Home elevator \$20,000-\$50,000

(above prices include installation)

Moving to a senior facility will involve a number of initial outlays plus the monthly living expenses shown in the table below which roughly compares independent living, assisted living and nursing homes.6

- Average cost of movers: \$1,000-\$1,500 (2-3 bedrooms) Average real estate fees for sale: 2.5% of the selling price
- (e.g. \$10,000 on a house of \$500,000)
- Average cost of retirement residence (monthly), assisted living or nursing home:

	1 or 2 bedroom apartment	1 bdrm limited kitchen	Nursing home
Monthly housing	\$1,500-\$3,000	\$2,500-\$4,000	\$4,000-\$8,000
Meals	Optional (higher cost)	3+	3+
Personal care	No	Yes	yes
Mobility assistance	No	Yes	yes

Independent living facility

Assisted living facility

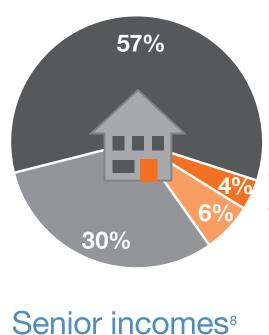

### Aging in Place<sup>2</sup> A recent AARP survey found that

of seniors want to stay in their own homes

as they age, often referred to as "aging in place." Even if they begin to need

day-to-day assistance or ongoing health care during retirement, most,

would prefer to stay in their homes.

Seniors live7...

4% in a nursing home

6% in senior living communities **30%** alone

**57%** with spouse or family

### In 2009 the median income for

seniors was

## 

The US Centers for Disease Control cites FALLS as the leading cause of injuries in seniors Causes<sup>9</sup> **Effects**<sup>9</sup>

### **Home structures:**

### stairs, handrails, uneven floors, etc.

**Home fixtures:** trip hazards (clutter, small rugs, shoes),

### step stools & ladders, tubs, etc.

**Health:** balance & strength, medicines, vision, use

of mobility devices, previous falls, etc.

#### Physical: bruising, fractures, head injury, burns, pneumonia

### or worse.

**Immobility:** reduced activity, loss of muscle, stiffer joints, etc.

### Mental:

depression, loss of confidence, fear, restriction of lifestyle, etc.

Prevention is key

Nearly 32% of seniors have suffered an injury from falling

exercise, review your medicines, check your vision and make your home safer!! (grab bars, safe stairs, railings, mobility

in the past year<sup>10</sup> devices, lighting, etc.)
